UX Developer / Designer

New York, NY

Skills

Development: HTML, CSS, Sass, JavaScript, TypeScript, React, Storybook, JIRA, GIT, Ruby on Rails, Python, R and R Studio

Design: Figma, Adobe XD, Sketch, Miro, InVision, Photoshop, Illustrator, InDesign

Work Experience

PRUDENTIAL

Design System UI Developer / Designer II — July 2021 - Present

Design System UI Developer / Designer — July 2019 - July 2021

- As a co-founder of the design system, collaborated with designers and mentored engineers in how to implement the design system across various front-end frameworks and prototyping tools.
- Increasing efficiency of design and development and improving customer experience standards by leading workshops with designers, developers, and stakeholders about design/development collaboration, best practices for establishing scalable code, and the value of integrating the design system across the product lifecycle.
- Translating and implementing product design requirements into over 80 reusable, scalable, design system web components that range from adaptable atomic features to complex application-level interactive structures.
- Ensured standards of visual design and development were met in over a dozen product launches, by providing guidance on how to use the system, communicating and aligning deliverable deadlines with stakeholders, and reviewing prototypes with engineering to ensure proper implementation.

Projects

Prudential Align Design Conference Presentation — October 2023

- Organized and led a conference workshop on how Figma could be used to improve design and development communication, that was attended by over 50 by designers, engineers, and product owners.
- Improved the skill set and knowledge of team members with Figma by creating role-specific exercises that taught participants how to leverage Figma's recently launched variables and dev mode.

350 NYC Climate Crisis Digest — January 2020 - Present

- Developed the full-stack infrastructure of two websites, Climate Crisis Policy Digest and The Earth Bill that provide information on climate change issues, and a climate bill to be introduced to Congress, for the non-profit group 350 NYC.
- Provided guidance to group leaders on the value of following a user-centered design process, and a database-driven tech stack.

Education

Carnegie Mellon University

Bachelor of Science in Information Systems, May 2019

Additional Major: Statistics

Minor: Human-Computer Interaction

GPA: 3.72 / 4.00
